

Texecom Smartcom Installation Agreement

Dear Customer,

You are reading this because your service engineer has determined that your Alarm System is compatible with a potential Smartcom System Upgrade and your current Service Plan allows it.

Your engineer will have already explained how the Smartcom benefits you and how it will enhance your Security Systems performance while keeping you better informed of its status using the free Texecom App.

Please note, the Smartcom equipment we install will **remain the property of Britannic Security Systems and must not be sold or reassigned without the company's written consent.**

Should you terminate your maintenance and/or monitoring Agreement with Britannic for whatever reason Britannic reserve the right to recover the Smartcom signaling equipment upon your notice of termination.

Alternatively should you wish to purchase the Smartcom and not be bound by this agreement, the cost for supplying and installing the equipment will be **£220 plus VAT** which we will invoice you for after commissioning and then the equipment will become yours upon payment.

Please Sign this document confirming the acceptance of the conditions above and your agreement to proceed.

Customer's Name: _____

Customer's Address: _____

Customer's Signature: _____

Important Please Note:

The Smartcom should not be considered formal alarm monitoring, simply a sophisticated alert device and app which is entirely dependent on a viable broadband connection being available. Britannic make no warranty whatsoever regarding 3rd Party internet connectivity following successful commissioning.
