It only takes us 10 minutes to set up activate & start to get images sent to your mobile or computer

ONLY £300 PLUS VAT FITTED

This Camera can be fitted anywhere your mobile phone works to send you Images triggered by the inbuilt infrared sensor.

The Vosker Solar 150 (Shown without optional steel security case)

The **VOSKER V150** is a completely wireless, 4G LTE, security camera. The V150 4G cellular security camera will record HD images on board and send those images directly to your smartphone as they are captured. It's powered from a built in 10,000mA rechargeable battery and is also fitted with a solar panel to charge this battery, this means incredibly long running time. Our tests have shown that after a month of outdoor use sending dozens of images daily, the solar charging battery remained at 100% capacity. The camera needs no wifi connection and can be installed anywhere you have a mobile phone signal and moved whenever needed.

What is the difference between a regular trail camera and a Solar cellular security camera?

The **V150** cellular security camera holds extra technology such as a modem, SIM card slot, 4G capability, antennas etc. This allows a cellular security camera to not only record images but also to send them out to the **Vosker App** on your mobile phone or to your email address. A standard trail type camera will only record images/video to the memory card for viewing later. The extra technology of our cellular security camera means that they also incur some running costs too – which are costs of sending by 4G the images out to your phone or email address (just like a text message for example).

Ongoing Costs of the V150

For the first 7 days after you have activated your camera you will get unlimited images sent through to the app from the Vosker server. After this 7 day unlimited test period you will then need to choose one of [Vosker's monthly payment plans](#). These monthly payment plans range from about £7 per month to about £16 per month depending upon how many images you need sent through to the app there are 3 monthly options available. Alternatively, you can use the camera completely free of charge and just have all images stored on the included SD card for viewing later, rather than having them transmitted to the app on your mobile phone.

A Multi Network SIM card is supplied and pre-fitted

A SIM card is pre-fitted and pre-configured so there is no complicated set up for you to do, it's all been done for you before despatch. The **Vosker** security camera is also supplied with a 16G micro SD card (but you can install up to 32G micro SD cards if more storage space is needed) for storing thousands of recorded images on board.

Motion detection, night vision & angle of view

The **Vosker 150** has an inbuilt infrared flash for night vision and so will record images day or night whenever the camera is triggered by motion. It has a detection range of up to 27m (depending upon the size of the subject) and a detection angle of approximately 42 degrees. The lens angle of view pretty much falls in line with the detection angle at about 43 degrees to ensure you get an image of what activates the camera.

Remote control from the App. The camera can be remotely switched on or off and can be programmed to auto switch on or off with an inbuilt 7-day schedule or just be on alert 24/7. It will also show the temperature at its location and each image that is transmitted will be time and date stamped. The camera also has inbuilt intelligent filters, for example you could request only images of vehicles detected to be sent.

This Vosker 150 camera records and transmits images (photos) only, it does not record or send video footage.

Price plans - Vosker the manufacturer are a Canadian company and all their cellular price plans are shown in dollars. \$10, \$15 or \$20 The \$20 price plan for **unlimited images** will currently charge your credit/debit card between £15 & £16 per month. There is no minimum contract period and your chosen package can be changed or be opted in and out of as needed. The V150 comes with a 24 Month warranty. There are no hidden costs or ongoing service charges outside the plans.
